Subject : EXTENSION REQUEST: CSE0001 Digital Literacy Project

Dear Professor Dr. Kannan,

I hope this email finds you well.

In today's academic landscape, digital literacy is fundamental , and as a Student Digital Ambassador , I am committed to the technical excellence and integrity of my project deliverables. Whether it is submitting assignments or building a professional presence, I recognize that mastering these tools is a necessity for success.

I have successfully finalized a significant portion of the course requirements, including the Infographic Design (Task 1) , the Digital Portfolio (Task 2) across GitHub, LinkedIn, and Kaggle , and the Collaboration Platforms (Task 3). However, due to an unexpected health challenge over the past few days , I require additional time to ensure the final report and cybersecurity analysis meet the high standards expected for this specialization.

I kindly request an extension for the final submission until April 3, 2026. In alignment with the "Verification First" habit established during our cybersecurity modules , I am prepared to provide official medical documentation to support this request if necessary.

I truly appreciate your understanding and for considering this adjustment to my submission timeline.

Sincerely,

Ayush Singh - 25BCE10551

B.Tech CSE (Artificial Intelligence and Machine Learning), 1st Year
